- 3. When you have many embedded notes and linked notes in the note you want to convert, the algorithm searches within the vault to find them and save their paths in the DO\_NOT\_DELETE\_\_note\_paths.txt file. This searching process will take a few seconds (if you have many notes in your vault, and many linked mentions and embedded notes in your note), however, since the paths are now saved into this text file, any conversions you perform afterwards will be very fast.

## 4 Adding citations

Command: just mention that link that pertains to the literature file. I use the "p"+"number" naming convention. For example, "p1" would be the first literature file in my vault.

Example: In [[p1]], we see that...

# 5 Equations

Both equations and subfigures are written in the form of embedded notes, since they are encoded as notes.

warning

If you write an equation outside of the designated template in an embedded note, then the conversion will be faulty!

### 5.1 Writing the equation

Steps:

1. Press ctrl+P, then Quickadd: equation\_block\_single

$$E = mc^2 (1)$$

It supports the aligned equations, as seen in Equation (2).

$$\Delta W_{rg} = -\alpha \sum_{s} [R + \gamma V(s') - V(s)]$$

$$[\nabla_{w} \gamma V(s') - \nabla_{w} V(s)]$$
(2)

### 5.2 Referencing the equation

In Equation (1), we see that...

# 6 Figures

## 6.1 Adding figures

#### 6.1.1 No subfigures

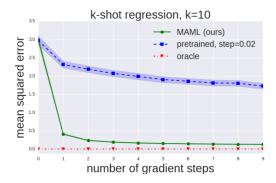

Figure 1: The caption.

#### 6.1.2 With subfigures

See Figure 2.

• + Allow user to create more complex configurations

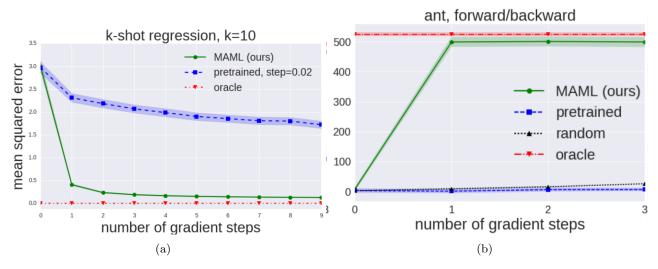

Figure 2

### 6.2 Referencing figures

In Figure 2, we can notice that...

### 7 Admonition blocks

If you write admonition blocks, they are translated into something similar in latex.

#### Example

warning
This is a warning

note
This is a note

#### 8 Code blocks

```
print("this is a code block")
print("this is another code block")
```

## 9 Cross-reference of section

Check this section (section 4) about adding citations.

### 10 \(\mathbb{H}\)Cross-reference of block

example

## 11 Assume sections from embedded notes

The sections from embedded notes can assume the hierarchy of the file wherein they are embedded.

#### note

Notice in the latex file that the section hierarchy has been modified to adhere to the hierarchy of the file that embeds the note.

14 Latex commands

When there is something niche, or some translation functionality that hasn't been developed yet, you can write a latex command within the code-block functionality of Obsidian, and the translator will not touch it.

Use the syntax according to the following example:
